CougarMail Password Reset

1. After logging into your Cougarmail account, select the dropdown arrow next to your CougarMail email address, located in the right upper corner, followed by “Account”.

2. Select the “Manage Security” link.
3. Select “Change password”.

4. Enter your current password in the associated field, followed by entering your new password in the next 2 fields. Select “Change Password” to complete reset.
5. If you are having other difficulties changing your password, please review below:

**Change your password on a phone or tablet**

1. Go to accounts.google.com/EditPasswd.
2. Type your current password and your new password. We highly recommend you create a unique password - one that you don't use for any other websites. See more password tips below.
3. Touch **Change password**.

**Change your password on a computer**

1. Click the gear in the top right.
2. Select **Settings**.
3. Click the **Accounts** tab at the top.
4. Click **Change password** in the "Change account settings" section.
5. Type your current password and your new password. We highly recommend you create a unique password - one that you don't use for any other websites. See more password tips below.
6. Click **Change password**.

*If you are unable to log into CougarMail, please try using the default password, the last 6 digits of your CWID. If this fails, please email Julie Youngblood and CC: James Anderson your full name, CWID, and preferred email address.*
