Allowing Third Party Cookies Using Safari for Mac

Students may encounter a second login prompt when trying to access channels in their CougarWeb. The following tutorial will walk you through the process of allowing third party cookies so that you may access the channels in CougarWeb.

Select Safari in the top left corner of your browser.

A drop down menu will appear, select “Preferences”.

In the “preferences” box select “Security”.

You will see “Accept cookies”. Select “Always” and then click the red “X” to close the box.
Select “Safari” in the browser menu and “Quit Safari”.

Reopen Safari and login to CougarWeb.

At this time you should have access to your channels in CougarWeb.
